August 22, 2024

BEIJING, Aug. 22, 2024 /PRNewswire/ -- Baidu, Inc. (NASDAQ: BIDU and HKEX: 9888 (HKD Counter) and 89888 (RMB Counter)), ("Baidu" or the "Company"), a leading AI company with strong Internet foundation, today announced its unaudited financial results for the second quarter ended June 30, 2024.

"AI Cloud continued to accelerate in the second quarter, offsetting the ongoing macro headwinds for online marketing revenue and resulting in modestly positive topline growth for Baidu Core. Operationally, we fast-tracked the renovation of Baidu search, which we believe will drive long-term success despite the short-term impact on monetization. We also achieved new breakthroughs with Apollo Go, which now offers 100% fully driverless ride-hailing services in practically the entire Wuhan municipality, and has started scalable testing of the latest RT6 vehicles," said Robin Li, Co-founder and CEO of Baidu. "Gradually, the transformative impact of Gen-Al and foundation models is becoming more tangible in business and everyday life. Throughout all layers of our Al technology stack and with the rapid adoption of applications built on top of ERNIE, we are scaling Al to address real-world problems and generate substantial value both for external customers and our own product portfolio."

"As we speeded up the Al-native transformation of our products in the second quarter, we continued to optimize our operations and maintained a healthy margin," said Rong Luo, CFO of Baidu. "For Al Cloud in particular, we expect growth to maintain a strong momentum."
