- **Net income attributable to Baidu** in the third quarter of 2013 was RMB3.048 billion (\$498.0 million), a 1.3% increase from the corresponding period in 2012. **Diluted earnings attributable to Baidu per ADS** for the third quarter of 2013 were RMB8.63 (\$1.41); **diluted earnings attributable to Baidu per ADS excluding share-based compensation expenses** (non-GAAP) for the third quarter of 2013 were RMB9.04 (\$1.48).

"We were pleased to see strong results in the third quarter as revenue remained on a solid growth trajectory," said Robin Li, chairman and chief executive officer of Baidu. Mr. Li continued, "I am proud of the progress we made during the quarter. Our flagship mobile products like search and maps continue to gain momentum. We solidified our mobile native app distribution capabilities with the 91 Wireless acquisition. Third Quarter 2013 Results

Baidu reported **total revenues** of RMB8.892 billion (\$1.453 billion) for the third quarter of 2013, representing a 42.3% increase from the corresponding period in 2012.

Online marketing revenues for the third quarter of 2013 were RMB8.848 billion (\$1.446 billion), representing a 41.7% increase from the corresponding period in 2012. Baidu had about 464,000 active **online marketing customers** in the third quarter of 2013, representing a 19.0% increase from the corresponding period in 2012 and a 0.9% decrease from the second quarter of 2013.

Revenue per online marketing customer for the third quarter was approximately RMB19,100 (\$3,121), a 19.4% increase from the corresponding period in 2012 and a 18.6% increase compared to the second quarter of 2013.

Traffic acquisition cost (TAC) as a component of cost of revenues was RMB1.039 billion (\$169.7 million), representing 11.7% of total revenues, compared to 8.6% in the corresponding period in 2012 and 11.6% in the second quarter of 2013. The increase mainly reflects the increased contribution of contextual ads and hao123 promotions through our network.

Bandwidth costs as a component of cost of revenues were RMB512.6 million (\$83.8 million), representing 5.8% of total revenues, compared to 4.3% in the corresponding period in 2012. **Depreciation costs** as a component of cost of revenues were RMB369.4 million (\$60.4 million), representing 4.2% of total revenues, compared to 4.4% in the corresponding period in 2012. The year-over-year increase in bandwidth costs was mainly due to the consolidation of iQiyi.

Content costs as a component of cost of revenues were RMB222.2 million (\$36.3 million), representing 2.5% of total revenues, compared to 0.5% in the corresponding period in 2012, and 2.0% in the previous quarter. The increase was mainly due to iQiyi.

Selling, general and administrative expenses were RMB1.384 billion (\$226.2 million), representing an increase of 115.4% from the corresponding period in 2012, primarily due to promotional expenses for mobile products.

Research and development expenses were RMB1.091 billion (\$178.2 million), a 77.5% increase from the corresponding period in 2012, primarily due to an increase in the number of research and development personnel.

Share-based compensation expenses, which were allocated to related operating costs and expense line items, were RMB143.1 million (\$23.4 million) in the third quarter of 2013, compared to RMB56.7 million in the corresponding period in 2012 and RMB83.3 million in the second quarter of 2013.

Safe Harbor Statement

This announcement contains forward-looking statements. These statements are made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intends," "plans," "believes," "estimates," "confident" and similar statements. Among other things, the outlook for the fourth quarter 2013 and quotations from management in this announcement, as well as Baidu's strategic and operational plans, contain forward-looking statements. Baidu may also make written or oral forward-looking statements in its periodic reports to the U.S. Securities and Exchange Commission, in its annual report to shareholders, in press releases and other written materials and in oral statements made by its officers, directors or employees to third parties. Statements that are not historical facts, including statements about Baidu's beliefs and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from those contained in any forward-looking statement, including but not limited to the following: our growth strategies; our future business development, including development of new products and services; our ability to attract and retain users and customers; competition in the Chinese and Japanese language Internet search markets; competition for online marketing customers; changes in our revenues and certain cost or expense items as a percentage of our revenues; the outcome of ongoing, or any future, litigation or arbitration, including those relating to intellectual property rights; the expected growth of the Chinese language Internet search market and the number of Internet and broadband users in China; Chinese governmental policies relating to the Internet and Internet search providers and general economic conditions in China, Japan and elsewhere. Further information regarding these and other risks is included in our annual report on Form 20-F and other documents filed with the Securities and Exchange Commission. All information provided in this press release and in the attachments is as of the date of the press release, and Baidu undertakes no duty to update such information, except as required under applicable law.

About Non-GAAP Financial Measures

To supplement Baidu's consolidated financial results presented in accordance with GAAP, Baidu uses the following measures defined as non-GAAP financial measures by the SEC: adjusted EBITDA, operating profit excluding share-based compensation expenses, net income excluding share-based compensation expenses and basic and diluted earnings per ADS excluding share-based compensation expenses. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. For more information on these non-GAAP financial measures, please see the tables captioned "Reconciliations of non-GAAP results of operations measures to the nearest comparable GAAP measures" and "Reconciliation from net cash provided by operating activities to adjusted EBITDA" set forth at the end of this release.

Baidu believes that these non-GAAP financial measures provide meaningful supplemental information regarding its performance and liquidity by excluding certain expenses, particularly share-based compensation expenses, that may not be indicative of its operating performance or financial condition from a cash perspective. Baidu believes that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning and forecasting future periods. These non-GAAP financial measures also facilitate management's internal comparisons to Baidu's historical performance and liquidity. Baidu has computed its non-GAAP financial measures using the same consistent method from quarter to quarter since April 1, 2006. Baidu believes these non-GAAP financial measures are useful to investors in allowing for greater transparency with respect to supplemental information used by management in its financial and operational decision making. A limitation of using these non-GAAP financial measures is that these non-GAAP measures exclude share-based compensation charge that has been and will continue to be for the foreseeable future a significant recurring expense in our results of operations. A limitation of using non-GAAP adjusted EBITDA is that it does not include all items that impact the Company's net income for the period. Management compensates for these limitations by providing specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables have more details on the reconciliations between GAAP financial measures that are most directly comparable to the non-GAAP financial measures.
